Was ist da die richtige Antwort?

Kommentar: Sooner or later the share of Muslims among inhabitants of the Teutony will increase to over 50 percent. Consumption of alcohol, then, shall be generally prohibited. ~~~ Watchful members of the Muslim Revolutionary Guard Corps will detect any transgressor and delight this person instead of alcohol with 99 strokes of the cane. ~~~ As a result, socio-economic damages of alcohol consumption could be avoided, and Teutonic life will be in the line with the principles of the Sharia.
